## CYBERSECURITY ANALYST | SECURITY OPERATIONS | INCIDENT RESPONSE

Cybersecurity professional with a Master's degree in Management Information Systems and Cybersecurity, Certified in Cybersecurity (CC), and more than 20 years of experience spanning network engineering, enterprise systems support, software quality assurance, and security-focused operations. Hands-on experience building and operating a full enterprise cyber range using Splunk, Wazuh, Security Onion, VMware, Windows Server, Linux, Active Directory, Sysmon, and pfSense. Skilled in threat detection, log analysis, SIEM administration, vulnerability assessment, incident response, security monitoring, and enterprise troubleshooting.

## CORE COMPETENCIES

---

Security Operations Center (SOC) • Threat Detection • Incident Response • SIEM Administration • Splunk • Wazuh • Security Onion • Log Analysis • Vulnerability Assessment • Threat Hunting • Active Directory • Windows Security • Linux Administration • Sysmon • Network Security • Risk Assessment • Security Monitoring • Malware Analysis Fundamentals • VMware • Documentation

## CYBERSECURITY PROJECT EXPERIENCE

---

### Founder & Cybersecurity Lab Engineer | MaryShield Cyber Enterprise Security Lab | 2025–Present

- Designed and deployed a realistic enterprise cybersecurity environment supporting blue-team, SOC, and incident response operations.
- Built infrastructure consisting of Windows Server 2022 Domain Controller, Windows 11 Enterprise, Ubuntu Server, Kali Linux, Security Onion, Splunk Enterprise, Wazuh, pfSense, and Metasploitable.
- Implemented centralized logging using Splunk Enterprise, Universal Forwarders, Sysmon, and Wazuh agents.
- Configured Active Directory, DNS, network segmentation, firewall rules, and security monitoring workflows.
- Developed attack detection and monitoring use cases for reconnaissance, privilege escalation, brute-force attacks, and endpoint activity.
- Performed vulnerability assessments, threat hunting exercises, log analysis, and incident investigations.

## PROFESSIONAL EXPERIENCE

---

### AT&T | QA Test Engineer | Apr 2017 – Jun 2025

- Executed test planning, validation, regression testing, and defect management activities for enterprise applications.
- Analyzed system behavior, identified defects, and partnered with development teams to resolve issues.
- Created test documentation, reports, and quality metrics supporting successful software releases.
- Applied analytical problem-solving and troubleshooting skills within large enterprise environments.

### AT&T | Solutions Center of Excellence Systems Engineer | Feb 2013 – May 2015

- Provided network design, systems engineering, and technical consulting for enterprise customers.
- Collaborated with engineering and security teams to validate architectures and maintain service integrity.

### Harris Corporation Government Solutions | Network Control Specialist | Nov 2008 – Jun 2010

- Monitored and supported FAA network infrastructure.
- Performed root-cause analysis, incident troubleshooting, and operational reporting.

### Fidelity Information Services | Network Engineer I | Apr 2006 – Aug 2008

- Configured Cisco routers and supported enterprise network infrastructure projects.
- Maintained network documentation, IP addressing plans, and deployment activities.

**Additional Experience:** Network Analyst – AT&T Global Network Services | Network Technician – IBM Global Network Services

## EDUCATION

---

Master's Degree, Management Information Systems / Cybersecurity – Nova Southeastern University

Bachelor of Science, Business Administration (Computer Information Systems) – Florida Atlantic University

## CERTIFICATIONS

---

Certified in Cybersecurity (CC) #3218235 | CompTIA Network+ | CCISP (In Progress)
